PARTS/TEST CERTIFICATE

S-TC-SC0369-14

Software Application Program

Issued to

LS Retail

Hagasmari 3, 201 Kopavogur, Iceland

In respect of

Software application program for use in a price computing point of sales device (POS) tested as a separate part to a weighing instrument intended to be used for direct selling to the public.

Identification

Type: LS Nav POS
Version: 10.xx where xx is any number
Manufacturer: LS Retail, Hagasmari 3, 201 Kopavogur, Iceland

Characteristics

The tested software is designed for summing articles and printing of receipt and is connected to a weighing instrument.

Description and documentation

The tested software is described in this certificate and documented in the documentation folder held by RISE. This is issue 3 of this certificate and replaces earlier issues. The update of the certificate is performed due to the need to limit the program version.

In accordance with

Paragraph 8.2 of the European Standard on metrological aspects of non-automatic weighing instruments EN 45501:2015, WELMEC 8.8 issue 2, WELMEC 2.2 issue 3 and WELMEC 2.3 issue 3. This certificate does not have the meaning of a type approval document as mentioned in the Directive 2009/23/EC Non-Automatic Weighing Instruments.

This document may not be reproduced other than in full, except with the prior written approval by RISE Certification.

1. General

All properties of the tested equipment, whether mentioned or not, may not be in conflict with the legislation and standard mentioned in the document.

2. Essential characteristics

2.1 Functions

- Receiving of weighing data
- Price-computing
- Totalization
- Printing
- Cancellation
- Additional functions, which facilitate trade and management

2.2 Software description

The software program is meant to be used for point of sales device (POS) based on a free programmable PC.

The POS receives only the weight data from the Non-Automatic Weighing Instrument and performs the price calculation.

2.3 Software identification

Version: LSNav2.0/LSNav2.0/2.0.1.0/1014001

2.4 Checking of program correctness

The CertifiedScale Class, "POS Weighing Utility" Codeunit, Scale Assembly (LSOposScale.DLL) and OPOS Scale CCO mentioned here, are considered to be Legally Relevant Software for the Scale Certification. The Version Number and Checksum for all of them can be viewed at any time in the LS Nav POS by pressing keys Ctrl+Shift+F6 or from the POS's Hardware Information Panel.

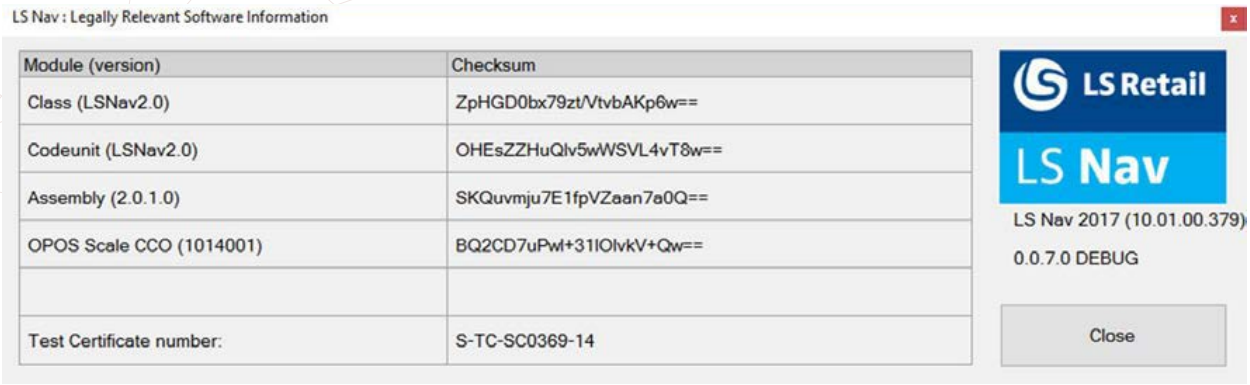

Figure 1: Legally Relevant Software Information dialog

The table on the Form contains the Legally Relevant Software Information. Module and Version in the left column and MD5 Checksum in the right column.
The right hand side of the dialog shows the LS Nav Logo and version information for the, non-legally relevant, LS Nav Solution. The upper version text is the main LS Nav version, the lower is the current POS Control (add-in) version.

2.5 Software securing

If checksums are invalid the checksum text will be shown in red indicating that the Legally Relevant Software has been modified. If checksums are invalid the Scale Device will not be enabled.

The software operates with protected software interfaces. For more information about securing of the software see report regarding Welmec 2.3 performance referred to in "Tests carried out".

This document may not be reproduced other than in full, except with the prior written approval by RISE Certification.

3. Essential shapes

The POS must have an Operators Display, touch screen and/or PLU-keyboard, Printer and a Customer facing Display.

4. Connections (computer hardware)

The POS shall be equipped with a protective interface RS232 or USB for connecting to the Non- Automatic Weighing Instrument and other interfaces.

5. Specification for hardware and operative system

The operative system shall be equal or later than:
- Windows 7
- Windows Server 2008 R2

For more detailed information regarding system requirements for Microsoft Dynamics NAV please see the Requirements for Microsoft Dynamics NAV 2015 on https://msdn.microsoft.com/en-us/library/dd301054(v=nav.80).aspx
The hardware shall consist of a PC with celeron processor (or compatible) ≥ 1 GHz, ≥1 Gb Ram, ≥30 Mb hard disk space.
Customers display 1 or 2-row matrix LCD 20 signs minimum. Signs height ≥ 9,5 mm on customer display.

6. Tests carried out

The software is tested in accordance with WELMEC 2.2 and WELMEC 2.3, EN 45501, 8.2 and Welmec 8.8. The results are documented in test reports 4P02503-01-1 dated 2014-05-27 and report 4P02503-02-01 dated 2015-04-08.

7. Allowed deviations from EN 45501 according to WELMEC guide 2.2 point 5

1. The height of the numerical figures need not to be the same for the customers and vendors display.
2. The height of the numerical figure of the vendors display needs not to be ≥ 9.5 mm if the data are clearly readable by the vendor in their normal operating position.
3. The unit price (UP) and price to pay (PP) may remain visible until the next operation is performed.
4. Point 5.3.1 is not applicable to the non-segmental displays.

8. Markings and inscriptions

Markings with manufacturers name, software type and version can be seen in accordance with figure 1. For access to the test certificate number see chapter 12 “Access to checksum”.

9. Layout of operators display

Figure 2: Example of operators display with registration of weight item

Figure 3: Manually entered weight

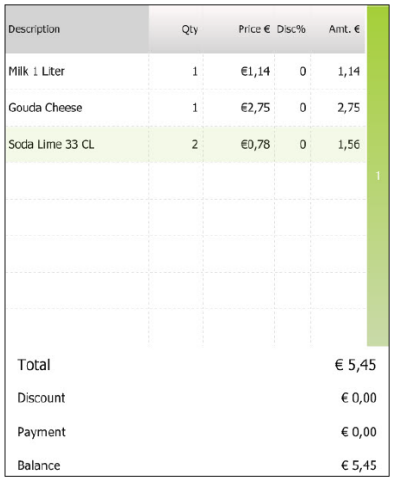

Figure 4: Non-weight item

This document may not be reproduced other than in full, except with the prior written approval by RISE Certification.

10. Presentation on customer display

Two row display:

When weight items are processed in POS the text in accordance with figure 5 appears on the customer display.
